

STSM Title: Establishment of the CKD registry and cost efficient follow up for a delay in the requirement for RRT

Origin institution
University Clinic for Nephrology, Faculty of Medicine,
University of Ss. Cyril and Methodius, Skopje, R. N.
Macedonia
Grantee: Zhaklina Shterjova Markovska MD, PhD fellow in
Clinical Medicine

Host institution
Department of Internal Medicine of the University Hospital
Kralovske Vinohrady, Prague, Czech Republic.

Menthor: Prof. Ivan Rychlik, MD, PhD, FASN, FERA FISN

The purpose of this STSM was to enhance the understanding of CKD and improve patients care, treatment outcomes, and epidemiological trends within a specific geographic area or patient population by gathering critical database related to CKD patients and creating a National Registry in R. North Macedonia.

Goals and outcomes

With the knowledge gained from this STSM action we will be able to build:

- a solid foundation for the development of a modern and sophisticated Registry for patients with CKD with and without requirement of RRT
- better deliverables in monitoring the work of hemodialysis units
- better outcomes in the treatment of these patients.

I believe the experience gained would be extremely useful and give a window of opportunities for a comparison and future collaborative research between our University Clinic of Nephrology in Skopje, Republic of North Macedonia and the Department of Internal Medicine of the University Hospital Kralovske Vinohrady in Prague, Czech Republic.
